

## MODUM Ladder with back protection.

MODUM Ladder is manufactured in weather-proof anodized aluminium in a slim and elegant profile. It is suitable for 2 and 5-story buildings.

In case of an emergency, the MODUM Ladder can open with a simple pull of a Release Pin, and it is ready for use in a few seconds.

With the anti-slip aluminium rungs, climbing and going down is safe and easy.

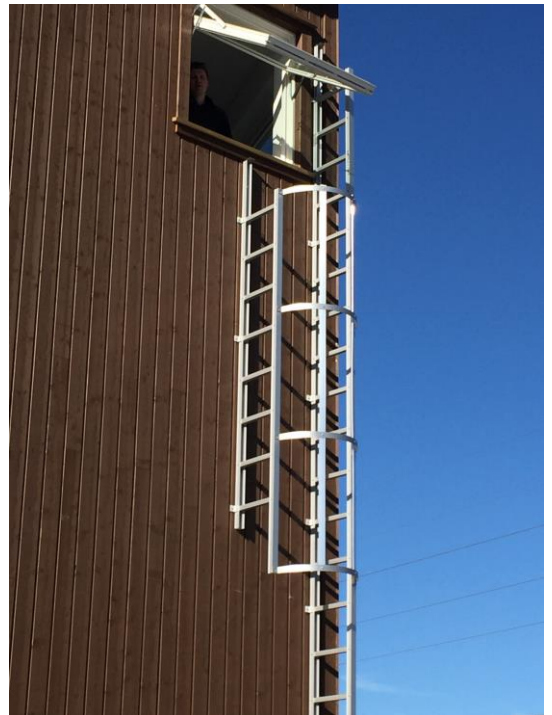

The ladder is tamper-proof and can only be opened from above - thus preventing unauthorized access from the ground.

It is the perfect solution for new buildings or aftermarket installation.

- Available in RAL colours.
- The non-slip telescopic aluminium steps are hidden when the ladder is closed.
- The Release Pin is positioned to accommodate open from above while preventing unauthorised access from the ground.
- The Installation is very easy and is finalized in a few hours.

### Stability

- Vertical stability:
  - 9.5 kN = 969 kg.
- Horizontal stability:
  - 2 kN = 204 kg.
- Closed:
  - 72 mm deep x 650 mm inside with
  - 1 telescopic step unfold to 145 mm deep
  - 2 telescopic steps unfold to 319 mm deep
  - 3 telescopic steps unfold to 492 mm deep
  - 4 telescopic steps unfold to 665 mm deep
