

The MODUM Universal Ladder

The MODUM Universal Ladder is a foldable two in one solution.

A foldable quick and safe escape ladder combined with an Inspection ladder

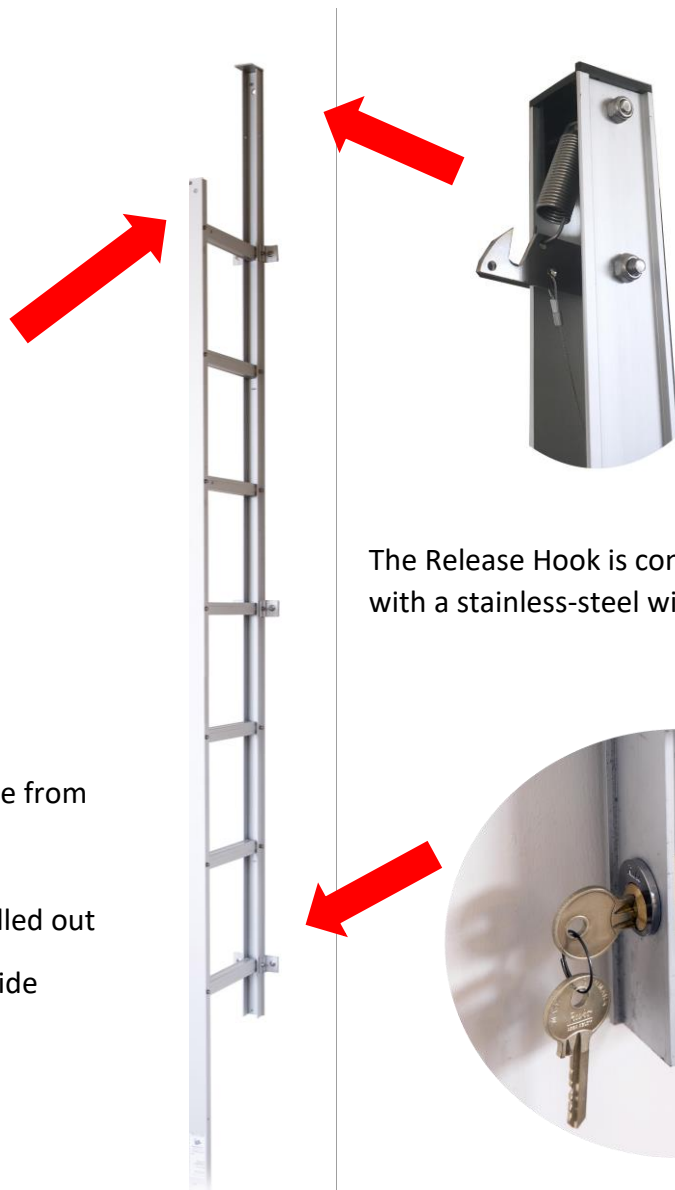

The ladder provides secure access to the roof from the ground.

It is the perfect solution for new buildings as well as an aftermarket installation.

The Release Pin is reachable from a window or balcony.

When the release pin is pulled out the ladder opens - and provides a quick and safe escape.

The Release Hook is connected to the Ruko lock with a stainless-steel wire.

The Ruko-lock is placed at ground level. The lock prevents unauthorized usage.

The MODUM Universal Ladder properties

- Produced in 100% anodized aluminium and supplied with mounting kit in acid-proof stainless steel.
